

On site inspection

Each client has specific needs and requirements. That's why we offer a full range of related services. Beyond the supply of air filters, we offer a service of filter dimension and sizing.

The maintenance, change or investment in a new range of filters requires precise measurements. Indeed, it is a job that can be time consuming and tedious. It is above all to write a precise and detailed quotation, that we propose this service.

AFPRO FILTERS

Since its beginnings in 1979, AFPRO Filters has secured a leading role in the international air filtration market. We give our customers the best air quality via our energy efficient air filters and PM1 air filters that protect you against PM1 particulate matter.
