

Company Profile

ur Company

Controlstore is an established, leading and respected HVAC peripherals provider in the control and automation industry, and we have been assisting customers with their HVAC needs since 2009. We assist a range of customers from walk-in retail customers to sole traders and national companies, and we pride ourselves on our excellence in sales support and customer service. We have offices in **Sydney, Brisbane** and presence in **New Zealand**.

We stock the **full range of all leading and key HVAC brands**, from full systems to field devices, as well as peripherals such as controllers, sensors, and valves.

Our Technical assistance is backed up by our suppliers, as well as **Controlworks Pty Ltd** and **Powerlink Solutions Pty Ltd** to provide guidance and assistance.

ur commitments

Our commitment in being proactive and customer driven means we will even source non-standard items at the right price to meet your particular needs. We are continually looking to the future, finding the latest developments in **HVAC automation**, and sourcing new product ranges and suppliers.

Rest assured, you can trust and rely on **Controlstore's** team to provide you the right advice and products, at the right price, and at the right time to ensure you achieve an efficient **HVAC system**.

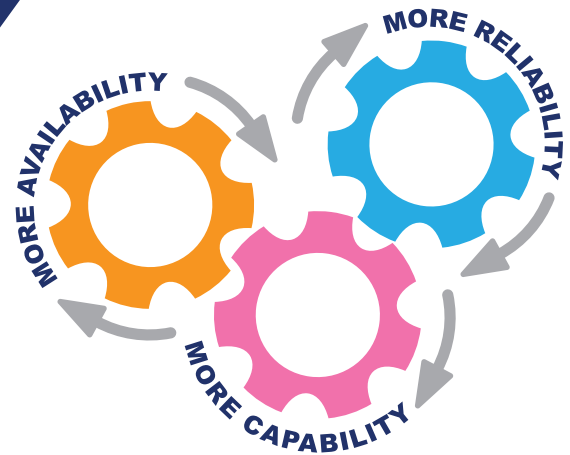

ur Approach

HVAC with MORE

Controlstore's approach is unique because we are passionate about discovering and meeting our customers' needs, being proactive and providing you with **MORE than just products** – more availability, more reliability, more capability.

We are customer driven and technology agnostic so we will always provide the best advice and products for our customer's needs. We will even source non-standard items at the right price. We are continually looking to the future, finding the latest developments in **HVAC automation**, and sourcing new product ranges and suppliers that will enable us to cater to all our customer's requirements and unique needs. We constantly educate our staff and expand their knowledge on government regulations and trends that affect our industry.
