

# REFRIG HEAL+H CHECK™

## Refrigerant Gas and Oil Analysis Kit

The A-Gas REFRIG HEAL+H CHECK™ provides a comprehensive analysis of refrigerant gases in a live system to identify the presence of contaminants.

### Professional Refrigerant and Oil Quality Analysis

The analysis results are presented in a detailed report showing the quality of the samples provided compared to AHRI 700 standard. The report is accompanied by expert advice for remediation of any problems identified.

- ✓ Performance benchmarking
- ✓ Improved energy efficiency
- ✓ Preventative maintenance
- ✓ Early detection
- ✓ Troubleshooting
- ✓ Fast, convenient and simple to use

# REFRIG HEAL+H CHECK™

## Refrigerant Gas and Oil Analysis Kit

REFRIG  
HEAL+H  
CHECK™

Refrigerant  
Gas and Oil  
Analysis  
Kit

### Tests Carried Out

**Vapour Sample:** Non-Condensable Gases (NCG)

**Refrigerant:** Purity, composition, moisture, boiling residue, acidity, chloride and particulates

**Oil:** Viscosity, moisture, acidity, particulates and wear metals

### ANALYSIS KIT CONTAINS:

**Vapour  
Sample Cylinder**

Test for  
Non-Condensable  
Gases (NCG)

**Liquid  
Sample Cylinder**

Test for purity,  
composition, moisture,  
boiling residue,  
acidity, chloride and  
particulates

**Oil  
Sample Canister**

Full oil analysis  
inclusive of: viscosity,  
acidity, moisture,  
particulates and  
wear metals

**Sample Hose**

To ensure a clean  
sample and accurate  
results are obtained

**Complete  
Instructions**

Step-by-step  
user guide to  
ensure sampling  
accuracy
