Flags when a pressure relief valve has blown off.

eTattle switch gives contacts to signal the occurrence.

The Tattle Shack option houses the Tattle unit under a durable polycarbonate shelter to protect from inclement weather such as rain & hail, while still allowing vision of the flag arms.

High Pressure model option suitable to handle up to 46.5Bar (675psi) that may be desired for CO<sub>2</sub> refrigeration systems.

Suitable for use with all Natural and Synthetic Gases and Refrigerants, including ammonia & carbon dioxide.

### Features:

- Anodized aluminium body & indicator flags
- Stainless steel axle & paddle
- O-ring axle seals
- Design pressure (standard) 20.6Bar (300psi)  
HP model 46.5Bar (675psi).
- Easy to install and maintain
- Low Pressure drop
- Flag position viewable from a distance.

Sizes: 1”FPT, 1¼”FPT, 1½”FPT in threaded connections

To suit flanges 50ND (2”), 65ND (2½”), 80ND (3”) & 100ND (4”)

## Other EZ-SRV Relief Valve solutions

## Hansen's replaceable cartridge relief valve

EZ fitting can remain as a permanent fixture and available in welded or threaded connections.

Revolutionary cartridge design allows quick and easy replacement without the need to disconnect any pipe work. A time saver.

Pressure settings of up to 42 Bar possible on 1/2" and 3/4" (15ND and 20ND) inlet models EZB and EZC.

Traditional Hansen H56 models available and three way dual shut-off valves with weld or threaded connections also available.
